

1.7 Raise 6

Images from the walk to the waymarker tree.

The rowan, seen from the rising path, near the junction with the zig-zags.

Both trees are exposed, battered by the wind, but persevering. Brown Cove and Keppel Cove occupy the views westward, leading up to White Side and Raise. The rocky flanks of Catstyecam are due south.

The rowan stand each side of the colossal upthrusting split rock, its deep fissure only seen from the lower slopes near the track junction.
