

5.5 Carl Side 5 and 6

Images from the walk to the waymarker tree.

Upper: the 'lonely tree' appears ahead as you meander upwards beside Slades Beck, to where the path crosses from one bank to the other; and *lower:* the rowan has enveloped its rocky pedestal, emerging from the stony ground at one with the steep slope, spreading and seeding its progeny – creating a new miniature grove.

The first or last tree, whichever you prefer, to stand in the upper valley. Note, to the left, how the path has crossed the beck at the place shown by the waymarker.
